Mr. Robert E. Brinkman
U. S. Atomic Energy Commission
Isotopes Branch
Division of Licensing & Regulation
Washington 25, D.C.

Dear Mr. Brinkman:

Confirming our telephone conversation we request amendment of our radio-isotope license 24-1113-8(G-65)(amended) to increase our authorized limits of:

Tin 119
Iodine 125
Tantalum 182
Tellurium 121
Tellurium 123
Tellurium 127

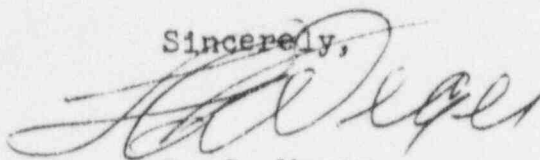

from 10 millicuries to 75 millicuries.

We understand that if these limits are approved that any sealed sources will come under condition #17 as listed in the present license and relating to leak testing.

At this time we also desire to add the names of William E. Koerner and Richard M. Levy to those names listed in item #12 of the present license. Qualifications of these nominees are attached.

As we discussed we are in urgent need for a larger source of Iodine 125 than presently authorized, and we will be grateful for any expediting you can render.

Sincerely,

L. C. Weger
Safety Director
Research Center &
General Offices
