

Department of the Army
Fitzsimons Army Medical Center
ATTN: HSHG-RP
Aurora, Colorado 80045-5001

Gentlemen:

Please find enclosed Amendment No. 52 to your NRC material license. You should review this amendment carefully and be sure that you understand all conditions. If you have any questions, you may contact the reviewer who signed your license amendment at 817/860-8100.

Please note that your license authorizes possession of materials in quantities that require financial assurance for decommissioning. You are reminded that you must review the provisions of 10 CFR Part 30, Section 30.35 and submit the documents required by that section no later than July 27, 1990.

All licensee are required to comply with the recordkeeping requirements specified in 10 CFR 30.35. Accordingly, Condition 18 has been included in your license to require that you maintain records specific to the safe and effective decommissioning of facilities under the purview of this license. Records are to be maintained at the Department of the Army, Fitzsimons Army Medical Center, Aurora, Colorado. These records should contain the identification of areas or locations where contamination remains after cleanup procedures have been implemented or at locations in which there is a likelihood that contamination may have spread to inaccessible sites. These documents must identify spills or other unusual occurrences involving the spread of contamination in and around equipment, facilities, or sites; include "as-built" drawings and outline modifications of structures and equipment in restricted areas where radioactive materials are used and/or stored; identify specific locations of possible inaccessible contamination such as buried pipes, concrete in existing physical plant structures (floor, walls, ceilings), and storage vaults; and provide information relative to the identification, quantity, chemical or physical form, and concentration of nuclides involved in contaminating incidents.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.

2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purposes indicated in your license.
4. Notify NRC in writing of any change in mailing address (no fee required if the location of radioactive material remains the same).
5. Request and obtain appropriate amendments if you plan to change ownership of your sole proprietorship or partnership, change the corporate status of your company, change locations of radioactive material within NRC jurisdiction, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. A license fee may be charged for the amendments if you are not in a fee-exempt category.
6. Submit a complete renewal application with proper fee, or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material.

You will be periodically inspected by NRC. A fee may be charged for inspections in accordance with 10 CFR Part 170. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Action, 10 CFR Part 2, Appendix C. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which the NRC expects of its licensees.

Thank you for your cooperation.

Sincerely,

Original Signed By

Vivian H. Campbell
