Re: Multi - Agency Radiation Survey and Site Manual

Dear Sirs:

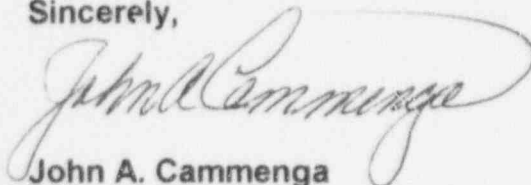

Thank you for the opportunity to comment on the above mentioned "Site Manual".

The underlying problem is the number of agencies involved in the project. The NRC already performs more than adequately in the area of radiation contamination control. All of the additional agencies only add cost to the American tax payer and harassment to the U.S. Manufacturers.

If the goal of our current legislative body is to reduce the cost of government, here is another place to cut.

We realize that many of these agencies raise their own budget funds by fees and fines, but regardless of how we try to hide the cost, it still amounts to a means of taxation and expense to the American public.

Sincerely,

John A. Cammenga
