ACT REQUEST

FOIA-85-481

rec'd 7/8/85

Dear Ms. Norry,

In accordance with the provisions of the FOIA, I request the following documents:

All training manuals and other technical reference and instructional documents used at the NRC Training Center.

Discussions with Brian Grimes of I&E and with Steve Showe at the Training Center have identified the following documents:

1. Technical manuals used for "Fundamentals" courses

1.1 Boiling water reactors, including

BWR 4
BWR 6

1.2 Pressurized water reactors, including

Westinghouse
Babcock and Wilcox
Combustion Engineering
(under development)

2. Manuals used for "Systems" courses.

2.1 Boiling water reactors, including

BWR 4
BWR 6

2.2 Pressurized water reactors, including

Westinghouse
Babcock and Wilcox
Combustion Engineering
(may be under development)

8511180007 850702
PDR FOIA
HANAUER85-481 PDR

3. Radwaste systems manual

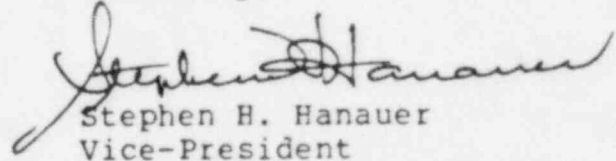

BWR and PWR

My request is not limited to these listed documents.

Both Mr. Grimes and Mr. Showe stated that the GE documents had already been released under the FOIA, but were unable to identify the recipient or the FOIA number. Someone Mr. Showe consulted said he thought it was about two years ago. If some documents I have requested are in fact already in the PDR, your identifying them would be helpful to me.

Mr. Grimes and Mr. Showe told me that the PWR documents would have to be reviewed for possible proprietary material, and that this would take six months. While I cannot object to such a review, I would strongly object to a delay so flagrantly in excess of the statutory response time to FOIA requests.

Sincerely,

Stephen H. Hanauer
Vice-President
