RE: License No. 24-15670-02

Dear Sir:

With reference to your letter of December 5, 1985, we submit the following statement.

Prior to the inspection by Messrs. Michael Kunowski & Jack M. Leger, I had applied for and received an amendment to our license to permit the use of these gauges by persons having satisfactorily completed the device manufacturer's training program.

The amendment however was incorrect and has now been corrected.

As stated in the report of inspection, the gauges were returned to their proper place of storage and locked up. All notices are posted and no one will be permitted the use of these gauges without my specific approval.

Each person authorized to use one of the gauges will be required to complete an intended use form stating date gauge was removed from storage, intended use of gauge, location of intended use, and date of return.

DEC 19 1985

A copy of training certificate for each person authorized the use of gauges shall be maintained in our files.

We anticipate full compliance with the above stated corrective actions by time of receipt of this letter.

Respectfully,
CITY-WIDE ASPHALT CO., INC.
