

DEC 20 1985

Docket No. 50-213

Connecticut Yankee Atomic Power Company
ATTN: Mr. J. F. Opeka
Senior Vice President - Nuclear
Engineering and Operations Group
P. O. Box 270
Hartford, Connecticut 06101

Gentlemen:

Subject: Inspection Report 50-213/85-15 Revised Response

This refers to your December 3, 1985 revised response to violations cited in NRC Region I Inspection Report 50-213/85-15 dated July 19, 1985. That revised response changed your commitment to get proposed modification packages to the onsite review committee at least one month prior to the start of an outage. This commitment had been instituted to insure that staff work for modifications was completed far enough ahead of time to assure timely documentation and review of proposed modifications and thereby lessen the pressure on modification package reviewers.

It is our understanding that, as of December 16, 1985, only 5 of the approximately 32 intended modification packages for the refueling outage beginning on January 4, 1986 had been successfully reviewed and approved. We are concerned that your negation of the earlier commitment indicates a lack of commitment to timely modification review. Consequently, please submit, within 15 days of the date of this letter, those compensatory actions and oversight activities you intend to implement to assure that thorough, timely, and well-documented reviews are conducted prior to implementation of modifications.

Your cooperation with us is appreciated.

Sincerely,

8512270111 851220
