RE: Revision of Gd-153 Amendment #35
of License #12-00929-13

Dear Ms. Holt:

Please amend our recent amendment #35 dated June 21, 1985 of our Broad Medical License #12-00929-13 to generalize Section 7W to include other approved manufacturers of the Gd-153 source approved for use as a component of the Lunar Radiation Corporation Model DP3 Spine/Femur Scanner. In particular, please add New England Nuclear #NER-430, Amersham #GDC-CYL, or any other NRC registered source supplier approved for the above named scanner. These sources were not available at the time of the original amendment request in March, 1985, and so as not to further delay this urgent patient service, and considering we are fully authorized for possession and use of Gd-153, your prompt addition of these other model numbers will be most appreciated.

If you have any further questions, please contact myself or Jerome E. Majewski, M.S. at 942-5763. Enclosed is amendment fee check for \$120.00.
