Attn: Material Licensing Section

Gentlemen:

I would like to amend our current license (No. 21-16355-01) to include the authorization, the possession and use of a Texas Nuclear Model 5206 source head containing Cs-137 in Texas Nuclear Model 570-57157C capsule with no single source to exceed 500 millicuries.

This device will be installed on a thick walled vessel in our Zimpro process. It will be used as a level sensing device. Traffic in the area is minimal and is limited to necessary operations and maintenance personnel. Champion International Drawing A-2-1427 is enclosed. It shows the area and location where this device will be installed.

All other conditions of licensure will remain the same.

Enclosed you will also find the required \$40.00 amendment fee.

Very truly yours,

William T Miller
