Atlanta, GA 30302

Gentlemen:

SUBJECT: REPORT NO. 50-424/85-51

On October 21-25, 1985, NRC inspected activities associated with your application for an NRC license for the Vogtle facility. This inspection was conducted as part of the NRC review of Readiness Review Module 2, Operations Training and Qualification. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

Findings were identified during this inspection which are addressed as inspector followup items in the enclosed inspection report. The nature of the majority of these findings (specifically, 424-85-52-01 through 12, 15, 17, 23, 26, 31 through 33, and 36) indicates significant administrative deficiencies in your training program which should have been resolved at this stage of your program development. To finalize conclusions and issue a readiness review report for module 2, it is necessary that we understand your assessment of these findings and your action to resolve them. Consequently, a response to this letter is requested which addresses each of the inspector followup items delineated above. To support the current schedule for completion of NRC review of module 2, this response is requested by December 30, 1985.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ORIGINAL SIGNED BY
JOHN A. OLSHINSKI /FOR

J. Nelson Grace
Regional Administrator
