ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (16)

On December 5, 1985 at 1853 hours a firearm was discovered by security personnel in a nylon duffle bag belonging to a Virginia Electric and Power Company employee. The firearm was a Charter Arms three inch Bulldog 44 Special, loaded with five rounds, and was discovered in the personnel access area via an x-ray machine. The firearm was immediately confiscated by security personnel. The employee was retained, questioned regarding the firearm, searched to ensure he had no other weapons and finally escorted off-site by security personnel. Unit 1 was in a refueling outage and Unit 2 was operating at 100 percent power at the time of the event. A follow-up investigation was completed on December 9, 1985 which included a polygraph test on the individual. The results of this investigation corroborated the employee's initial statement that the firearm was in the duffle bag by accident and that he was not intentionally attempting to gain access with the firearm. This event is reportable pursuant to 10 CFR 73.71 (b).

TEXT (If more space is required, use additional NRC Form 366A's) (17)

On December 5, 1985 at 1000 hours a firearm was discovered by security personnel in a nylon duffle bag belonging to a Virginia Electric and Power Company employee. The firearm was a Charter Arms three inch Bulldog 44 Special, loaded with five rounds, and was discovered in the personnel access area via an x-ray machine. The firearm was immediately confiscated and subsequently transferred to the security weapons vault by security personnel. The employee was denied access to the protected area and questioned regarding the firearm to which he stated that he did not know the weapon was in the duffle bag. The employee was searched for other weapons with negative results. The employee was subsequently escorted offsite with access to the station denied pending a follow-up investigation. Unit 1 was in a refueling outage and Unit 2 was operating at 100 percent power at the time of the event. The follow-up investigation was completed on December 9, 1985 and included a polygraph test on the individual. The results of the investigation corroborated the individual's initial statement. The employee's access authorization was re-instated on December 9, 1985. This event is reportable pursuant to 10 CFR 73.71(b).
