Docket. 70-1113

GENERAL ELECTRIC

NUCLEAR FUEL MANUFACTURING DEPARTMENT

GENERAL ELECTRIC COMPANY • P.O. BOX 780 • WILMINGTON, NORTH CAROLINA 28402

December 3, 1985

Dr. J. Nelson Grace, Regional Director
U. S. Nuclear Regulatory Commission, RII
101 Marietta Street, NW - Suite 2900
Atlanta, Georgia 30303

Dear Dr. Grace:

Subject:

Construction is currently underway around the north end of the AEBG/SCO building at the General Electric Company facility in Wilmington to accommodate an increase in building space for the Aircraft Engine Business Group. (See attached sketch.)

As a result of this construction, the main traffic entrance to the Nuclear Fuel Manufacturing Department has been moved from the north to the south roadway. Services previously available at the North Gate (NRC inspector badges, etc.) will now be available through the main lobby or the temporary South Gate, and ultimately, at the new South Gate which is presently under construction.

During this transition period, procedures will also change slightly but should not result in an adverse impact on NRC access. Once the transition is complete, the NRC will be updated regarding any new access routines.

If you have any questions regarding this matter, please contact me at (919) 343-5461.

Very truly yours,

GENERAL ELECTRIC COMPANY

T. Preston Winslow, Manager
Licensing & Nuclear Materials Management
