U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Attn: Patricia J. Whiston

Re: Control No. 78244

Dear Ms. Whiston:

In response to your letter received September 10, 1985, we are supplying you with the following additional information:

We possess one detector cell.

The model number is (0331-3368), which is the same as was listed on our previous license. We had been licensed previously and are only applying again because we let our license lapse. I am including a copy of our old successful application for you.

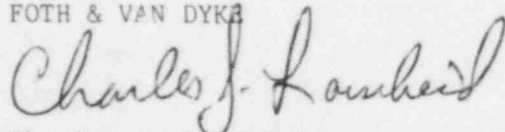

We intend to dispose of the foil by sending it back to the manufacturer.

If we need to clean, remove or exchange the foil, we intend to send it back to the manufacturer or another authorized firm.

We send radiation leak test samples to Nuclear Sources & Services, Inc., of Houston, Texas.

Sincerely,

FOTH & VAN DYKE

Charles J. Larscheid
