UNIT NO 1
10CFR50.62 REQUIREMENTS FOR REDUCTION OF RISK FROM ANTICIPATED TRANSIENTS
WITHOUT SCRAM (ATWS) EVENTS

In our September 30, 1985 submittal (RJR 85-474), the District committed to provide for your review, a description of our design for meeting the requirements of 10CFR50.62.

The District had originally committed to provide this design description by January 1986. In recent meetings with members of your staff, the District committed to provide an improved schedule for implementation of Auxiliary Feedwater improvements using the Districts Living Schedule. Due to this change in our scheduled workload, the District will not be able to complete the design description for meeting the requirements of 10CFR50.62 until July 1986. At that time the District will submit a description of the design for your review. This revised schedule for furnishing our design description will not change our original implementation schedule for the modification.

If you have any questions, call Robert Roehler of my staff.

R. J. RODRIGUEZ
ASSISTANT GENERAL MANAGER,
NUCLEAR
