NOTICE OF VIOLATION

Testing Engineers and Consultants,  
Incorporated

License No. 21-18668-01

As a result of the inspection conducted on October 30, 1985, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violations were identified:

1. 10 CFR 20.401(a) requires that each licensee maintain records showing radiation exposures on Form NRC-5, in accordance with the instructions contained in that form, or on clear and legible records containing all the information required by Form NRC-5.

Contrary to the above, exposure records containing the required information were not maintained. Specifically, the records did not identify the name, date of birth, or social security number of any individual for whom personnel monitoring was provided.

This is a Severity Level V violation (Supplement IV).

2. 10 CFR 71.5 requires each licensee who transports licensed material outside of the confines of its plant to comply with the applicable requirements of the Department of Transportation in 49 CFR Parts 170-189.

49 CFR 177.817 states that a carrier may not transport a hazardous material unless it is accompanied by a shipping paper that is prepared in accordance with 49 CFR.

Contrary to the above, a licensee representative stated that appropriate shipping papers did not accompany licensed materials when transported between temporary job sites.

This is a Severity Level IV violation (Supplement V).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
