Attention: Mr. Edward Butcher, Acting Chief
Operating Reactors, Branch No. 3

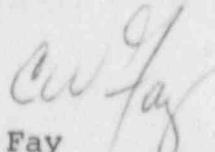

Gentlemen:

DOCKET NOS. 50-266 AND 50-301
CORRECTIONS TO INSERVICE TESTING PROGRAM
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

On August 26, 1985, we submitted a revised Inservice Testing Program for the Point Beach Nuclear Plant, Units 1 and 2. We have, subsequently, identified three additional corrections to this program description. These changes involve revising the Unit 1 and 2 valve tables and Relief Request No. 16 to correct the designation for valve "3200 A CHK" to "3200 AA".

A copy of the corrected pages for the valve tables (page 31 for Unit 1 and page 27 for Unit 2) and a revised "Valve Relief Request No. 16" are attached. Please contact us if you have any questions regarding this matter.

Very truly yours,

C. W. Fay
Vice President
Nuclear Power
