Hutzel Hospital
ATTN: Ray A. Carlson
Medical Physicist
4707 St. Antoine Blve.
Detroit, MI 48201

Gentlemen:

Enclosed is Amendment No. 30 to your NRC License No. 21-03001-01 in accordance with your request.

We have not added Sanford Wagenberg, M.D. as the preceptor statement submitted did not contain sufficient information. Please submit the following: a copy of Supplement A showing Dr. Wallenberg's name in box 1 as the one we have is blank. On Supplement B, the area to list generator elutions and reagent kit preparation is blank. Dr. Wallenberg must have had at least 5 of each to qualify to use Group III materials. Also, is the 4 months clinical training listed in box 3 equivalent to the required 500 hours clinical training? Please refer to Appendix A (enclosed) for minimum training requirements for authorized users.

We did not authorize Drs. Weiner or Critchfield for Group I use as they did not submit any documentation showing their experience with Group I material. Please refer to the enclosed Appendix A for the minimum training requirements.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.

REG3 LIC30
21-03001-01 PDR

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By
Patricia M. Vacherlon
Materials Licensing Section

Enclosure(s):

1. Amendment No. 30
2. Preceptor Package

Phone Record Nov 26, 1985 8:25am CST

From: P. Vachulon, NRC

To: Frank Jacobell
President

I asked Mr. Jacobell if he concurred with the request in letter dated August 13, 1985 to delete six users and add three new users.

He agreed stating that the deleted doctors have either retired or left the facility
