Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

River Bend Station - Unit 1
Docket No. 50-458

In Gulf States Utilities Company's (GSU) letter dated August 6, 1985, a commitment was made to provide confirmation for those Human Engineering Discrepancies (HEDs) scheduled for completion prior to exceeding five percent of rated power. This letter serves as confirmation that the HEDs required by five percent of rated power have been completed. This satisfies the five percent portion of License Condition No. 16, Attachment 5, Item 3, identified in the River Bend Station Operating License No. NPF-40. Upon completion of those HEDs scheduled for implementation prior to operation past the first refueling outage, a letter of confirmation will be provided.

Sincerely,

J. E. Booker
Manager-Engineering
Nuclear Fuels & Licensing
