OFFICE OF THE  
DOCUMENTATION & SERVICES  
BRANCH

Dear Sir:

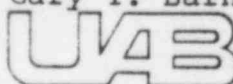

The proposed changes in 10 CFR Part 35 - Medical Use of By Product Material published in Volume 50, No. 144 of the Federal Register Friday, July 26th, 1985 has been reviewed by the Radiation Therapy, Nuclear Medicine and Radiation Protection Committees of the American Association of Physicists in Medicine. The general consensus of these Committees and AAPM Science Council is that the proposed rules are a significant step forward and should result in a simplified licensing process.

The majority of comments that were brought to Science Council's attention were minor in nature and were communicated directly to the Secretary of the Commission by the concerned individuals. The only general comment of a negative nature that I can bring to your attention is that the proposed regulations attempt to provide all definitions, documentation and regulations in one place. In this regard, the proposed regulations did not succeed in that several regulatory guides were referred to. It is also not clear where these guides and Form NRC-13 can be obtained. Instructions in this regard will save applicants and the NRC time and innumerable phone calls.

In summary, I congratulate the Nuclear Regulatory Commission in a highly successful effort.

Sincerely,

Gary T. Barnes, Ph.D.  
Chairman, Science Council  
Gary T. Barnes, Ph.D./Radiology
