Mr. John D. Kinneman

Re: Mail Control No. 03349

Dear Mr. Kinneman:

This letter is being written to confirm information I gave by telephone this morning to one of your associates concerning the usage of I-131 at Citizens General Hospital, New Kensington, Pennsylvania. I wish to assure you that I-131 is used exclusively at this institution in a capsule form for treatment of hyperthyroidism or for ablation therapy for carcinoma. I-131 in the form of a solution is never used at this institution.

Sincerely,

Ronald J. Clearfield, M.D.

Ronald J. Clearfield, M.D.
Chairman, Department of Radiology
and Nuclear Medicine
