Answer:

See answer to Interrogatory/Request No. E-24.

Interrogatory/Request No. E-24

Question/Request:

E-24. Please provide complete copies of all review(s) and/or engineering evaluations performed by Gibbs & Hill which forms the basis for the acceptance criteria and which "concluded that the criteria are applicable to the non-ASME structural welds at Comanche Peak." (Cf. page 3 of Mr. Council's letter.)

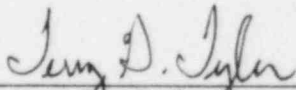

Response:

The statement made was based upon knowledge of the code requirements applicable to, and employed in, the design of supports and knowledge of the FSAR requirements applicable thereto, together with verbal confirmation from the designer that fatigue loading was not a factor in the design of the welds in question. No documentation was necessary to make, or obtained as a basis for making, the statement. The designer's concurrence in the use of VWAC is documented in DCA Nos. 23107 (Rev. 1), 23108 (Rev. 1) and 23109 (Rev. 1), which will be produced in accordance with paragraph 2 of "General Responses," as set forth in the answers filed by the Applicants on October 22, 1985.

As to Answers:

I, Terry G. Tyler, being first duly sworn, do depose and say that I am the Program Director of the Comanche Peak Response Team ("CPRT") (see "Comanche Peak Response Team Program Plan," 6/28/85), that I am familiar with the information contained in the CPRT files and available to CPRT third-party personnel, that I have assisted in the preparation of the foregoing answers, and that the foregoing answers are true, except insofar as they are based on information that is available to the CPRT (third-party personnel) but not within my personal knowledge, as to which I, based on such information, believe them to be true.
