Subject: [External_Sender] No to HOLTEC "temporary " nuclear waste storage in N.M.!

i am very concerned that nuclear waste storage cannot be done safely. In particular, the proposed "temporary" storage is a RUSE. First of all, federal law requires that waste must go to a permanent repository. And if this proposal goes through, after 40 years I'm guessing that it will just be "grandfathered in" due to lack of will and technology to safely move it somewhere else. THIS IS UNSAFE. The potential for irreparable damage to earth and water is too big a risk. Find a permanent home for thus deadly stuff!
