Docket No. 50-461
Docket No. 70-2947

Illinois Power Company
ATTN: Mr. W. C. Gerstner
Executive Vice President
500 South 27th Street
Decatur, IL 62525

Gentlemen:

This refers to the announced preoperational physical protection inspection and SNM control and accountability inspection conducted by Messrs. G. Pirtle, B. Drouin, and Ms. G. Christoffer of this office on August 26 through September 10, 1985, of activities at Clinton Power Station authorized by NRC Construction Permit No. CPPR-137 and SNM License No. 1886, and to the discussion of our findings with Mr. D. P. Hall and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations with NRC requirements were identified during the course of this inspection. The enclosed report does contain certain findings which must be corrected and/or resolved prior to fuel load. These findings will be reviewed during future preoperational inspections. No written response is required at this time.

This inspection concluded that senior management oversight of the Personnel Screening Program continues to be warranted. Additionally, a concern pertaining to the proposed schedule for complete implementation of the security program has developed during this inspection. Our concerns are addressed in Paragraph 5 of the report details.

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Section 73.21(c)(2) of the NRC's "Rules of Practice," Part 73, Title 10, Code of Federal Regulations. This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, our report of this inspection will not be placed in the Public Document Room.
