Docket No. 50-423

Northeast Nuclear Energy Company  
ATTN: Mr. J. F. Opeka  
Senior Vice President - Nuclear  
Engineering and Operations Group  
P. O. Box 270  
Hartford, Connecticut 06101

Gentlemen:

Subject: Inspection No. 50-423/85-63

This refers to the Preoperational Security Program Review conducted by Mr. William Madden of this office on October 21-25, 1985 at Millstone Unit 3, Waterford, Connecticut, of activities authorized by NRC License No. CPPR-113 and to the discussion of our findings held by Mr. Madden with Mr. R. Vogel and other members of your staff at the conclusion of the inspection.

The review was conducted to assess progress on the development of the Unit 3 security program. Areas examined during this review are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the review consisted of selective examination of proposed plan and procedural commitments for meeting the requirements of 10 CFR 73.55. It also included discussions with key members of the site security organization and project engineering staff responsible for the installation and testing of security systems, equipment and facilities. The inspector confirmed that all projects were on schedule and it appeared that the program would be ready for implementation in early November 1985, as scheduled.

Sections of the enclosed NRC Inspection Report have been determined to be exempt from public disclosure in accordance with 10 CFR 9.5(a)(4) (Commercial or Financial Information). Therefore, those sections will not be placed in the NRC Public Document Room and will receive limited distribution. This letter and the remainder of the report will be placed in the Public Document Room, in accordance with 10 CFR 2.790(a).

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:

James H. Joyner

Thomas T. Martin, Director  
Division of Radiation Safety  
and Safeguards
