Subject: Amendment for a Cobalt-60 Teletherapy Source

Dear Sirs:

This is a request for amendment to our NRC License No. 21-00943-03 for the use of a 6600 curie cobalt-60 teletherapy source. All information except that pertaining specifically to the teletherapy source is the same as contained in the renewed License No. 21-00943-03 issued on August 16, 1978.

Enclosed is the application of the amendment with all information included. Quick processing of this request would be appreciated so that we may receive our teletherapy unit at the end of October 1979. Thank you.

Sincerely,

Jeffrey T. Colvin, M.S.  
Medical Physicist
