

H. L. Price, Director  
Division of Licensing and Regulation

JUN 4 1959

Marvin M. Mann, Assistant Director for Compliance  
Division of Inspection

Signed  
by  
M. M. Mann

CITATION OF URANIUM REDUCTION COMPANY, MOAB, UTAH, SOURCE MATERIAL  
LICENSE NO. R-161, UNDER 10 CFR 20.201 (B) SURVEYS

SYMBOL: INS:LJL

Attention: L. R. Rogers

This will confirm my conversation with Mr. R. E. Cunningham of  
your office, concerning the above subject.

We believe that D. I. Walker, Director, Inspection Division,  
Idaho, may be technically correct in his evaluation in suggesting  
that the licensee be cited for noncompliance under 10 CFR 20.201(b)  
"Surveys." However, at the same time, we also recognize, as stated  
by Mr. Cunningham, that it may be unfair to cite the licensee on  
this matter, at this time, because the film badge survey program  
was in progress at the time of inspection. Secondly, the licensee  
had made other surveys to determine external radiation levels with  
apparently satisfactory results and, thirdly, a citation at this  
time would not necessarily be consistent with previous actions on  
similar cases. As an alternative to both views, we agree that this  
matter should be mentioned in the communication to the licensee  
concerning the March 30, 1959 follow-up inspection. We understand  
that this can be done conveniently by noting the results to date  
from the film badge program and ask that it be continued. The  
licensee can also be advised to determine whether or not the two  
film badge readings in question may possibly be in error because  
of contamination of the film itself.

In view of the foregoing, we agree that the licensee not be  
cited under 20.201(b) "Surveys."

We appreciate the opportunity to discuss this matter with you.
