CORPORATION
Crystal River Unit 3
Docket No. 50-302

May 28, 1997
3F0597-32

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D. C. 20555-0001

Subject: Licensee Event Report (LER) 97-003-02

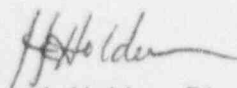

Dear Sir:

Please find the enclosed supplement to Licensee Event Report (LER) 97-003-02 regarding Generic Letter (GL) 96-01 testing deficiencies. This supplement reports test deficiencies discovered in April 1997.

Florida Power Corporation's (FPC) GL 96-01 review and corrective action will be completed prior to startup from the current outage and is identified as FPC Restart Issue R-1. Using the guidance contained in NUREG-1022 Revision 1, Second Draft, additional supplements to this LER will be submitted to report related logic system testing deficiencies. FPC's current schedule is to provide a final supplement which will identify detailed actions to prevent recurrence by August 15, 1997.

This report is submitted by FPC in accordance with 10 CFR 50.73.

Sincerely,

J. J. Holden, Director
Nuclear Engineering and Projects
