COMPLIANCE INVESTIGATION REPORT
FOR ATLAS CORPORATION, ATLAS MINERALS
MOAB, UTAH, LICENSE NO. SUA-917
(DOCKET NO. 40-3453)

INVESTIGATION CONDUCTED DECEMBER 27-28, 1971

RE: COMPLAINT

The subject investigation report has been reviewed. This is to confirm that we do not plan to correspond with the Atlas Corporation concerning this investigation. It appears from the findings of this investigation that there is no evidence of contamination of the Moab, Utah sewer system as alleged by the complainant. No items of noncompliance were noted during the investigation and Compliance Region IV notified the complainant by letter dated January 28, 1972 that an inspection of the subject licensee was conducted concurrently during the investigation of his complaint and that no evidence was found of excessive contamination or hazard to personnel resulting from the use or laundering of coveralls in the mill. We consider the case closed.
