Docket No. : 030-20969  
License No.: 50-23363-01  
Control No.: 70184

Ultra Technology, Inc.  
Pouch 340122  
Prudhoe Bay, Alaska 99734

Attention: Mr. Donald S. Heiken  
Radiation Safety Officer

Gentlemen:

This is in reference to your letters dated April 20, 1985 and July 3, 1985 to amend your byproduct material license. In order to complete our review, we need the following additional information:

1. As we stated in Items 1. and 2. of our letter dated May 29, 1985, the names, titles, and experience records of each individual who will conduct radiography training or who will be responsible for the day-to-day management or supervision of the radiography program should be submitted. We do not feel that this is unduly restrictive, as it describes only those personnel who will be acting as members of your management staff.
2. As we stated in Item 3. of our letter dated May 29, 1985, partial training provided by other licensees cannot be accepted unless it is specifically described in your application and is clearly supplemented by company-specific training and other necessary training as required by 10 CFR 34.31. We must verify that the training courses which you will use meet the regulatory requirements. You should submit descriptions of each training program that you plan to use to meet these requirements.

We cannot issue the amendment which you have requested without this information.

We will continue the review of your amendment request upon receipt of this information. You should submit your response within thirty (30) days from the date of this notice. Please reply in duplicate, and refer to Mail Control No. 70184.

Sincerely,

8603210232 851015
