Continuous Automated Multi-base
Line (Hybrid)
Radford Army Ammunition Plant
Radford, Virginia

SUBJ: Application for By-product
Material License - Industrial

Gentlemen:

Reference is made to your letter of November 5, 1980, regarding our application for a radioactive materials license regarding additional information you require to complete our application processing.

Under Item 1 of our application, our permanent address will be Centex Construction Company, Inc. - 2947 Gallows Road - Falls Church, VA 22042 and at temporary jobsites anywhere the NRC maintains jurisdiction. Our current location is at the Radford Army Ammunition Plant, Radford, VA - CAMBL Project.

Under your Item 14E regarding maintenance on gauges involving removal of source holder, we do not intend at this time to engage in our own repair work on the Troxler Model 3411-B Nuclear Density Testing Machine. We may at some future date request authority to do this type of repair work.

As we discussed, we have added two persons to our staff who will be performing tests with this machine. John M. Strickler and William E. Thompson have completed the Troxler Electronics Laboratories, Inc. training seminar.

Attached is a plan showing our storage area should this machine ever be stored at our home office. Should you have any further questions or require additional information, please advise.

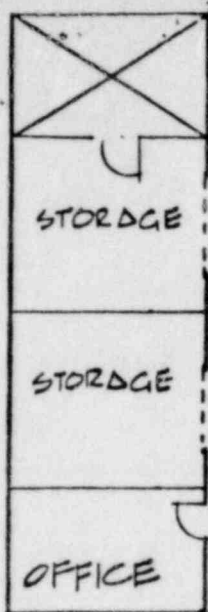

Very truly yours,
CENTEX CONSTRUCTION COMPANY, INC.

Donald P. McConnell
Chief of Quality Control
