Dear Sir:

We are in the process of completing our facility to manufacture polypropylene film and plan to use four (4) beta gauges to measure the thickness of film produced. The beta gauges are equipped with Promethium 147 (two) and Strontium 90 (two) sources. Please find enclosed the completed application (form AEC-313 I) and attachments for By-product Material License.

Any questions concerning this application should be directed to me.

Sincerely yours,

Edward C. Enderle
