Gentlemen:

SUBJECT: REPORT NO. 50-424/85-62

On January 6-10, 1986, NRC inspected activities related to Appendix E of the Vogtle Readiness Review Program authorized by NRC Construction Permit No. CPPR-108 for your Vogtle facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violation, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation.

Your attention is invited to the inspector follow-up items identified in the inspection report. Due to the nature and number of findings identified by the NRC staff pursuant to this inspection activity, the NRC has been unable to reach a conclusion regarding the acceptability of Appendix E. On this basis, we request that you review the findings disclosed in the enclosed report and provide a written response to each finding. Sufficient detail should be provided to permit a resolution of each finding as appropriate. To support the timely completion of the NRC review of this Appendix, your response is requested to be included with your response to the Notice of Violation.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.
