Moab, Utah

Dear Curly:

The filters Gen. Nelson used with the air-water sprays are the ones recommended in the spray catalog.

His results (50% knock down of air-borne dust) were based on the effect of sprays within an enclosure. Therefore, it would be well, as we discussed the matter, to place a hood of some kind over the sprays to make them more effective.

We appreciated very much your cooperation during our visit at the mill.

Very truly yours,

UTAH STATE DEPARTMENT OF HEALTH

Grant S. Winn, Ph.D., Director
Division Occupational Health
