

AUG 19 1981

DCS MS-016

Docket No. 50-344

Mr. Bart D. Withers  
Vice President Nuclear  
Portland General Electric Company  
121 S. W. Salmon Street  
Portland, Oregon 97204

RE: TROJAN NUCLEAR PLANT

Dear Mr. Withers:

We have reviewed your response to generic letter 81-04 regarding emergency procedures and training for station blackout events. Our review was to confirm that the subject procedures and training either currently exist or will be implemented on an acceptable schedule at your plant. Our review did not include an evaluation of the details provided in your response beyond that necessary to confirm the above.

You indicated that procedures and training for station blackout will be implemented at your plant, however, part or all of this implementation is tied to your efforts regarding NUREG-0737, Item I.C.1 and will not be done until after January 1, 1982. This schedule does not satisfy the urgency we have assigned to this matter. This schedule was originally proposed by the Westinghouse Owners Group in its letter, Jurgenson to Eisenhower, dated April 9, 1981. Our recent response is attached as an enclosure to this letter.

The intent of our request in 81-04 was to have operators prepared to respond to a station blackout event as soon as possible. While we agree that refinement of station blackout procedures and training may be in order based on the continuing work in this area, such as Item I.C.1 and the NRC's generic review (Unresolved Safety Issue A-44), these other activities do not justify a delay in implementing the actions requested in 81-04.

You are requested to expedite implementation of emergency procedures and training for station blackout such that they will be in effect by about September 1981. Please submit, within 20 days of the date of this letter, your revised schedule for implementation.

Sincerely,

Original signed by  
Robert A. Clark
