Pursuant to Title 10 Code of Federal Regulations Part 40.44, Source Material License No. SUA-917 is hereby amended to add the following condition:

11. For the purpose of complying with Section 20.103(b), 10 CFR 20, the limits given in Appendix B, Table I, of this part may be deemed to apply to exposures to the concentrations specified for 160 hours in any period of 28 consecutive days. In any such period where the number of hours of exposure is less than 160 hours, the limits specified in the Table may be increased proportionately. In any period where the number of hours of exposure is greater than 160 hours, the limits specified in the Table shall be decreased proportionately."

All other conditions of this license shall remain the same.

It has come to our attention that the above condition was inadvertently deleted when the license was amended and re-issued in its entirety on July 24, 1968.
