Re: Radiological Analysis of Ground Water
by Accu-Labs Research, Inc.

Dear Mr. Person:

The Thorium 230 value on B-14 reported in Plate A-10 of our Supplement to Environmental Report was in error. We re-sampled the hole following the Accu-Labs Research report and found the Thorium 230 content to be 4.0 pico curries/liter.

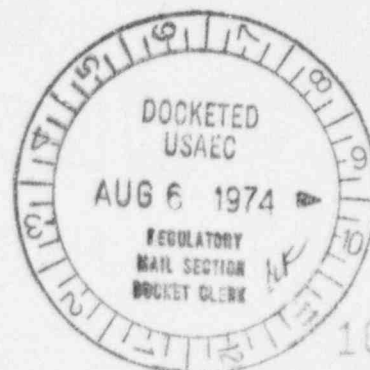

We will continue to monitor the test wells on a quarterly basis.

Yours very truly,

Gary Boyer
