The Northeast Utilities System

Docket No. 50-423

B16503

May 30, 1997

U. S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Millstone Nuclear Power Station, Unit No. 3  
Commitment Revision- Inservice Test Program  
In-Service Test Program And Procedures

The purpose of this letter is to clarify the commitments and revise the schedule for those commitments which were previously submitted to the NRC in LER 96-021-01 "Components Not Included In The In-Service Test Program As A Result Of Programmatic Deficiencies." These commitments include the review and revision of the existing IST documents and procedures as well as development and implementation of a procedure to administer and monitor the IST program. In the LER we stated that these actions would be completed prior to May 31, 1997.

The commitment concerning the review and revision of existing IST documents and procedures has been revised to specify that this includes review and revision of the IST manual and administrative control procedures used to meet overall program objectives. This expansion of the corrective action has resulted in a revised completion date of August 1, 1997.

The procedure to administer and monitor the IST program will be completed prior to July 1, 1997.

The revised commitments are provided in Attachment 1. The remaining commitments in our letter of December 13, 1996 are unchanged.

Should you have any questions regarding this matter, please contact Mr. D. A. Smith at (860) 437-5840.
