

5  
DOCKET NUMBER  
PROPOSED RULE PR-50  
(46 FR 41786)

P. Burr  
Walpole, N.H.  
03608

Secretary of the Commission:

To abandon the rules  
that require applicants for  
nuclear plant construction permits  
to submit information showing  
that they have sufficient  
funds to cover the cost of  
construction, to operate facilities  
safely, and to SHUT DOWN  
FACILITIES SAFELY is  
sheer, unadulterated, and  
utterly irresponsible folly.

Add: Jim Peterson  
AR-2016

safe method of disposal  
has not even been established —  
and you want to remove  
all responsibility of the  
company? Too bad you  
people, who are such imbeciles  
as to even contemplate  
that deregulation, don't  
have to camp out next  
a nuclear plant for the  
rest of your lives. Might  
wake you up a little.

Sincerely,

Pennifer Barr
