SUBJECT: NRC INSPECTION REPORT NO. 70-1201/97-203

REFERENCE: Reply to a Notice of Violation and Payment of Civil Penalty - NRC Inspection  
 Report No. 70-1201/96-202

Dear Mr. Carr:

A follow-up inspection to review your response to our Notice of Violation and Proposed Imposition of Civil Penalty dated March 4, 1997, was conducted by the Nuclear Regulatory Commission on March 25 - 27, 1997. The enclosed report presents the results of that inspection.

The inspection team found that the corrective actions already taken and implemented by your staff were adequate, and no additional violations were identified. Two previous violations were closed, while three violations remain open pending the completion of tasks, as identified in your response to the NRC. As was discussed at the exit meeting, the commitment dates you have set for completing the tasks to close the remaining three violations are adequate and will not have an adverse impact on the restart of the downloading operation.

Under the provisions of Section 2.790(d), reports containing information related to a licensee's MC&A program are exempt from public disclosure. Accordingly, the enclosure will not be placed in the Public Document Room.

Should you have any questions concerning this letter, please contact me.

Sincerely,  
 (Original signed by)  
 Philip Ting, Chief  
 Operations Branch  
 Division of Fuel Cycle Safety  
 and Safeguards, NMSS
