U.S. Nuclear Regulatory Commission, Region III
Materials Licensing Section
799 Roosevelt Road
Glen Ellyn, IL 60137

Gentlemen:

SUBJECT: Material License #13-18945-01
Renewal Application

030-17387

R Ed 6/30/85

Enclosed please find two copies of the subject application plus a check in the amount of \$150.00 to serve as the licensing fee as set apart in Rule 170.12 of 49 FR21293. This renewal application is submitted in its entirety. The following changes are being requested from our current license:

1. Radiation Protection Officer: changed from Terry McKinney to Dennis Watson.
2. Material Users: changed from Wayne Underhill to Les King and Robert Heacox.
3. The number of Texas Nuclear Model #570-57157C units is changed from eight to four. (There has always been only four of these units. This error was discovered during this renewal preparation.)
4. The number of Kay-Ray Model #7700D described in Item 5B is changed from six to 12. (There are six Kay-Ray's on each of Merom Station's two units. When the original application was filed, only six were listed because Unit 2 was still under construction.)
5. 96 Kay-Ray Model #7700D's as described in Item 5C are now added to our renewal application.

If you need additional information or have any questions, please contact us.

Sincerely,

Dale D. Winter, P.E.
Manager Power Production
