

JUL 30 1976

Charles E. Williams, Manager
Idaho Operations Office

ANC TECHNICAL ASSISTANCE TO DSS DURING THE TRANSITION QUARTER (JULY 1
TO SEPTEMBER 30, 1976) - CONTAINMENT EVALUATION
NRR Letter No. 186

This memorandum provides guidance to ANC for technical assistance to the Division of Systems Safety in the area of safety-related reactor licensing problems. The specific program, "Containment Evaluation," as defined in my memorandum of July 2, 1976 is herein amended to include an additional subtask, "Safety Relief Valve Evaluation," which is a carryover from FY-76. Enclosed is the scope of work for the Transition Quarter. The funding level for this additional subtask is estimated at \$15,000 and is provided in the DSS Financial Plan (No. 20-19-02-13) under DSS Financial Identification Number (FIN) A6009. This brings the total allotment for the "Containment Evaluation" program to \$75,000.

At the end of the quarter, a final report on this subtask should be submitted to Mr. John Kudrick, Section Leader, Section A, Containment Systems Branch. The cognizant engineer for the subject subtask is Mr. Nelson Su; both individuals may be reached at 301-492-7711.

A completed NRC Form 173 is enclosed; please sign and return it to the Office of Nuclear Reactor Regulation - Attention: J. Leonard.
