Re: License No. SUB-908
Docket No. 040-07604

Subject: RESPONSE TO ADMINISTRATIVE REVIEW COMMENTS ON LICENSE
AMENDMENT APPLICATION FOR ON-SITE DISPOSAL OF SWMU-102,
AN-1 AND CONTAINERIZED MIXED WASTES

Dear Mr. Nalluswami:

In response to NRC comments received ON August 29, 1996, BP Chemicals, Inc. (BPCI) submits the following information for incorporation in the subject license amendment application:

Item A: (Volume 1 of 4) Drawing 26 of 26 is omitted.

Response: The set of D-size drawings included in the application were only those being revised from the previous application (for the mixed waste pond closure project). A complete set of 11X17 drawings including Drawing 26 of 26 are also included in our August 2 submittal. These can be found in Volume 1 of 4 immediately preceding the D-size drawings.

Item B: (Volume 2 of 4) Appendix B contains analysis of long-term radiological impacts of the on-site disposal using RESRAD computer code (Version 5.05 dated March 11, 1994). Argonne National Laboratory (ANL) has revised the RESRAD computer code several times since March 1994, and the latest version should be used for the dose assessment.

Response: Enclosed is a revised Appendix B in which the dose assessment has been performed using the latest version of RESRAD (Version 5.62).

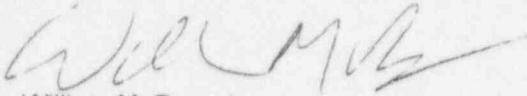

Item C: (Volume 2 of 4) Modified cost estimate is omitted.

Response: Enclosed is a revised cost estimate for the site-wide decommissioning project (including the mixed waste pond closure project) based on the scope of work contained in the subject application.

It is hoped that this supplemental information is both understandable and acceptable to NRC. If there are any further questions, please give me a call at (419) 226-1299.

Sincerely,
