

NOTICE OF VIOLATION

Lear Seigler, Incorporated

License No. 21-07265-01  
License No. SUB-924

As a result of the inspection conducted on March 11, 1986, and in accordance with the "General Policy and Procedures for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1985), the following violations were identified:

1. License No. 21-07265-01 and SUB-924

License Condition No. 12 states that licensed material shall be used by, or under the supervision of, a named individual.

Contrary to the above, licensed material is no longer used by, or under the supervision of the individual named in License Condition No. 12. Licensed material is being used by persons not authorized by the license.

This is a Severity Level IV violation (Supplement VI).

2. License No. SUB-924

License Condition No. 13 of License No. SUB-924 requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced applications and letters.

The referenced application dated March 3, 1980, states in Item No. 11(a) that periodic wipe tests will be made of work surfaces for potential uranium contamination.

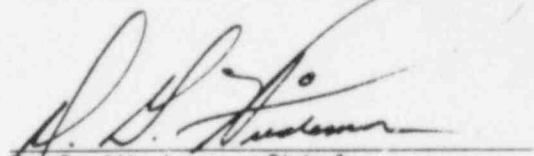

Contrary to the above, wipe tests of the "balance" area have not been performed as required. Specifically, wipe tests of the "balance" area were not performed after the last use of depleted uranium in October 1985.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each violation: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further violations; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
