U. S. Nuclear Regulatory Commission  
Licensing Section  
799 Roosevelt Road  
Glen Ellyn, Illinois 60137

Gentlemen:

We request that you amend our By-Product Material License to show the following changes:

1. We will be relocating the Nuclear Medicine Department into a new facility. The new MacNeal Memorial Hospital is located in the same block as the old hospital. The address will remain the same. Enclosed please find a diagram of the new facility for your review.

We expect the anticipated move to be completed on September 10, 1983. A close-out survey will be performed on the existing department before it is released for demolition and a copy of the survey will be sent to your office.

A temporary waste storage room will be set up as noted in the diagram. As soon as the permanent storage room is complete, the temporary room will be vacated and a close-out survey performed.

2. Please note that the new Radiation Safety Officer is Richard Provus, M.D. Dr. Provus is already listed as an authorized user of our By-Product Material License. Robert Marshall, M.D., will remain as an authorized user on the By-Product Material License.
3. Additional information will be forwarded to you regarding the requirements for Xenon 133. The exhaust air flow rates for the rooms and the fume hood and supply air flow rates will be submitted.
