NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

33

DEC 9 1977

MEMORANDUM FOR: G. C. Lainas, Chief, Containment Systems Branch, DSS  
FROM: T. M. Novak, Chief, Reactor Systems Branch, DSS  
SUBJECT: TASK ACTION PLAN A-39 ON BWR RELIEF VALVE LOADS

In addition to a heavy case workload, some of which we were forced to seek help from outside Technical Assistance programs, we are already committed to take part in ten Category A activities between now and July 1978. We simply have insufficient manpower to accommodate your projected .2 myr (~360 mh) during FY 1978. Should additional funding and manpower at INEL allow either an increase in their case load, or participation in some of our Category A generic activity (TAP A-17 in particular), we will again examine our schedule for accommodating TAP A-39.

Thomas M. Novak, Chief  
Reactor Systems Branch  
Division of Systems Safety
