

Docket No. 50-251
DRL:EEF

JUN 3 1965

General Electric Company
Atomic Products Division
P. O. Box 254
San Jose, California 95103

Attention: George White
General Manager

Gentlemen:

Reference is made to your request dated March 9, 1965, that the information contained in Part II of Supplement Number 2 to License Application for the Southeast Experimental Fast Oxide Reactor (SEFOR) be withheld from inspection by the public because it contained patentable information. A finding has been made that inspection of these documents by the public would adversely affect the interests of the General Electric Company. Further, it has been determined that inspection of the documents by the public is not required in the public interest.

Accordingly, you are hereby advised that Part II of Supplement Number 2 to License Application referred to above will be withheld from inspection by the public pursuant to paragraph 2.790 (b) of the Commission's "Rules of Practice," Title 10, CFR Part 2. Withholding from inspection by the public shall not, however, affect the right of persons properly and directly concerned to inspect the documents.
