MOTION FOR ORDER EXTENDING TIME TO SUBMIT
ADDITIONAL EVIDENCE AND ORDER EXTENDING TIME

TO THE ATOMIC SAFETY AND LICENSING BOARD PRESIDING HEREIN:

Applicants respectfully request that the time for submitting the additional evidence called for by the Board's Initial Decision herein be extended to November 15, 1965, and that the time for submitting supplemental proposed findings and conclusions or comments upon the additional evidence be extended to December 1, 1965. This motion is made on the ground that Applicants do not believe that they can adequately respond to the Board's order within the time allowed.

In support of this motion, Applicants state that:

1. The Board's order requires in part that Applicants submit evidence by one or more qualified experts concerning a supplemented meteorological survey program plan and, in connection with supplementary information to be submitted concerning environmental surveillance, that Applicants

A/20

show the extent to which certain information will be made available and acceptable to the Arkansas State Board of Health and the extent to which certain matters will be accessible to and coordinated with the Arkansas State Board of Health.

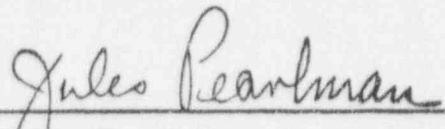

2. Applicants efforts to date to prepare the additional evidence required by the Board's order demonstrate that in order fairly to meet the conditions accompanying the order an additional period beyond October 15, 1965, will be required. Suitable arrangements with qualified experts in the field of meteorology must be made and it will be necessary for them to thoroughly review relevant background information. Additional time will be required for consultation with Applicants and for preparation of evidence to be submitted to the Board.
3. Representatives of the Arkansas State Board of Health and Applicants' expert meteorology consultants maintain their places of business at locations which are remote from Applicant General Electric's Advanced Products Operation in San Jose, California. In order to develop a suitable response to the Board's order, it appears that one or more meetings will be required with representatives of the Arkansas State Board of Health and with General Electric's expert consultants. A significant period will be required for the preparation of the site meteorology program. The geographical separation of the persons concerned and difficulties inherent in scheduling the required meetings and

preparing the evidence will extend the time required by Applicants to comply with the Board's order.

4. For the foregoing reasons, Applicants believe that the additional time requested will be required to prepare and file the additional evidence called for by the Board's order.

Respectfully submitted,

September 23, 1965.

Jules Pearlman
Attorney for Applicant
General Electric Company
175 Curtner Avenue
San Jose, California

ORDER

It is hereby ordered that the time for filing the additional evidence called for by the Initial Decision herein is extended to November 15, 1965, and the time for filing supplemental proposed findings and conclusions or comments upon the additional evidence is extended to December 1, 1965.
