MEMORANDUM FOR Edson G. Case, Acting Director  
Office of Nuclear Reactor Regulation

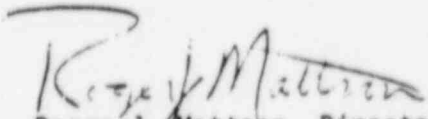

FROM Roger J. Mattson, Director  
Division of Systems Safety

SUBJECT DRAFT STATUS SUMMARY REPORT FOR NRR GENERIC  
TECHNICAL ACTIVITIES

My staff has reviewed the format and type of information contained in the Status Summary Report and believes it to be a useful tool for managing NRR Technical Activities. Two additions would increase its usefulness. The tasks or sub-tasks to be performed by outside organizations, and T/A contractors in particular, should be more clearly and consistently identified in the logic diagrams. The correlation between the logic diagram and the tasks specified in the Task Action Plan should be clearly made for all activities as was done for TAP A-1, Water Hammer. The usefulness to task managers would be increased if the manpower projected and expended were broken down by branch, either in this book or in some other form readily available to task managers.
