MEMORANDUM FOR: Gary M. Holahan, Chief  
Operating Reactors Assessment Branch, DL

FROM: Frank J. Congel, Chief  
Radiological Assessment Branch, DSI

SUBJECT: REVIEW OF DRAFT PROPOSAL FROM ILLINOIS FOR  
AGREEMENT STATE STATUS

(12)

In response to Faith Brenneman's request, we have reviewed the draft Proposal from Illinois for Agreement State Status. This proposal was contained in a memorandum from G. Wayne Kerr to H. R. Denton, dated August 12, 1985. Our review has focused on Section 6, "Standards for Protection Against Radiation," of Volume III, "Regulations," of the State of Illinois Application for Agreement State Status. We have reviewed the State's proposed radiation protection regulations according to the Criteria for Radiation Protection Standards contained in NRC's Policy Statement.\* We find that those portions of the State's proposed standards that are within NRR's area of expertise are in accordance with the radiation protection standards in 10 CFR 20.

This review was performed by Ed Branagan.
