

UNITED STATES
NUCLEAR REGULATORY COMMISSION
ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
WASHINGTON, D. C. 20555

June 13, 1985

MEMORANDUM TO: J. Ebersole
C. Michelson
G. Reed

FROM: Paul Boehnert, Senior Staff Engineer *B*

SUBJECT: ACRS COMBUSTION ENGINEERING (CE) SUBCOMMITTEE -
ASSIGNMENT OF DHRS ISSUE FOR CESSAR-80/PALO VERDE
NUCLEAR PLANTS

As a result of discussions held during the 302nd ACRS Meeting, the issue of DHRS and rapid depressurization capability for the CESSAR-80 design in general and Palo Verde in particular has been assigned to the CE Subcommittee. While not the CE Subcommittee Engineer, I have been assigned to track this issue given my familiarity with it.

Based on discussion with C. Wylie (Subcommittee Chairman), the addressees either have, or did, express concern(s) regarding this issue. Mr. Wylie instructed that I provide you with the relevant background material (attached). He requests that upon completion of perusal of this information, you prepare a set of questions/issues for consideration as discussion topics at an upcoming Subcommittee meeting. The Chairman will schedule a meeting after receipt of your discussion topics.

Please contact me if you desire additional information or have any questions. If any other Members desire the background materials, or wish to contribute potential discussion topics, please let me know. I also request that the addressees "cc" me a copy of the material you send to Mr. Wylie.
