Dear Sirs or Madam:

Bulletin NRCB 97-01 required Lunar to notify the NRC of actions concerning Victoreen instruments. The two Victoreen 530 instruments owned by LUNAR Corporation were inspected according to the customer corrective action procedures documented in the bulletin. Only one of the two meters (S/N 137) contained the suspected faulty resistor network. This meter was returned to Victoreen for repair. It was repaired and returned to LUNAR Corporation on April 24, 1997.

1/0
Jelz

Sincerely,

Robert Schulz
